The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Serrano et al. (U.S. 6,088,188).

Re claim 1, Serrano et al. teaches a disk drive having a power amplifier that supplies electrical current (or driving current) to a voice coil motor (VCM) to activate the VCM (see col. 4, 56-col. 5, ln. 17), and during a seek, incrementally decreasing the driving current if the power amplifier is found to be in saturation (see col. 6, ln. 45-col. 7, ln. 22).

Allowable Subject Matter

Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-27 are allowed. Independent claims 13 and 20 teach a method and means for adaptive seek control in a disc drive. Regarding claim 13, the prior art fails to teach alone or in combination the method of determining, upon detection of a servo sample, whether a seek operation is being performed; if a seek operation is being performed, determining whether the length of the seek operation being performed is longer than a predetermined seek length; if it is determined that the length of the seek operation being performed is longer than the

Application/Control Number: 10/086,163

Art Unit: 2651

predetermined minimum seek length determining whether the amplifier saturated during the

portion of the seek length operation; and if it is determined that the amplifier saturated during the

Page 3

portion of the seek operation, decreasing the maximum driving current. Regarding claim 20, the

Examiner interprets independent claim 20 as a "means-plus-function" claim under 35 U.S.C

§112, Paragraph 6. Claim 20 is interpreted to cover the corresponding structure, material, or acts

in the specification and equivalents thereof.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason C Olson whose telephone number is 703.305.8325. The

examiner can normally be reached on Monday thru Thursday 7:30-5:30; alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David R Hudspeth can be reached on (703)308-4825. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
